

**30-90Kgs**  
*in under 6 seconds*

**INTERSURGICAL**  
**i-gel** is the supraglottic airway from Intersurgical. It is now indicated for resuscitation<sup>1</sup> and can be inserted in less than 5 seconds<sup>2</sup>. A weight range of 30-90kgs+ means that it is suitable for the majority of adults. For a test drive visit [www.i-gel.com](http://www.i-gel.com), where you'll also find more information including videos, downloads and the latest news.
